

Field Service

Dreisilker is your source for year round 24 hour field service. Whether it is simply motor repair or complete motor management, we have the experience and personnel to serve all your needs.

Dreisilker Total Motor Management System

DTM™ is a complete program to improve production uptime, energy costs and inventory management. The program will manage all aspects of motor status; predictive and preventive maintenance as well as repair.

Integrated Motor Systems Program (DIMS)

Our Applications Engineers will review your motor system needs and recommend a custom solution. An Application Engineer will work with you from the start of the project through completion.

Electronic Repair

Our service technicians are continually trained for electronic repair. We have over 50 years experience repairing equipment in the plastics, machining, printing, paper converting, steel manufacturing, petroleum refining and food processing industries. We troubleshoot virtually any type of electronic equipment, drive or control including AC and DC drive systems, Eddy current clutch controls and other motor control systems.

Vibration Analysis

Using sophisticated diagnostic equipment we are able to determine any required service without interrupting your operation. We use a vibration data collector and Windows™ software that offers fast, accurate diagnosis of your motors and driver equipment. Our analysis provides critical data by plant area, specific points of the plant, and for individual equipment.

Infrared Testing and Analysis

Our Infrared Inspection analysis helps avoid catastrophic failures and accurately documents problem areas including: Loose Connections, Damaged Wiring, Overloads and Faults.

Field Balancing

Both on-site and in-house balancing services are available. Our trained technicians inspect, analyze and expertly balance your machinery using portable equipment.

Shaft Alignment

Proper shaft alignment can prolong the life and improve the efficiency of equipment. Using laser and computer alignment, our experienced staff can accurately align your machinery. Our staff can also perform corrective work on bases, frames, mounts and other structures. Complete machine shop service is also available at our repair facility.

Motor Testing

Dreisilker provides on-site testing and maintenance. Electrical testing, polarization index, surge comparison and other tests are performed. Maintenance includes inspection, cleaning, lubrication, minor repair work, and more. We can inform you of any recommendations or additional service required.

DREISILKER

ELECTRIC MOTORS, INC.

DREISILKER
 ELECTRIC MOTORS, INC.

The History of Dreisilker

Henry Dreisilker, a German immigrant, came to America in 1954 seeking opportunity and gainful employment. Hard Work and integrity landed him his first job in a small motor repair and appliance business. Seven months later he purchased the business and founded Henry Dreisilker Electric Motors and Appliance Service.

The company began by specializing in commercial motor repair and sales. Combining old-world craftsmanship with advanced technology, the company grew steadily from three employees to over 120.

What started as a 750 sq. foot facility has grown into one of the largest and most modern 73,500 sq. foot electric motor sales and repair centers in the USA. The corporate headquarters in Glen Ellyn is supported by 6 other sales locations throughout the Chicagoland area, as well as on the Internet via our e-commerce site, emotorstore.com.

Company president, Leo F. Dreisilker, continues to lead our company into the future as a world class provider of commercial and industrial motors, drives, controls, repair, and field service.

At Dreisilker, we are committed to quality, reliability, and customer satisfaction.

New Motors, Controls, Drives and Related Equipment

Our 7 branch locations inventory an extensive stock of new motors from top manufacturers like GE, Fasco, A.O. Smith and Marathon as well as other related products for the HVAC industry. Dreisilker Electric Motors also offers 24-hour emergency service and field service including Field Balancing, Infrared Inspection, Motor Management, Motor Testing, Shaft Laser Alignment and Vibration Analysis. Dreisilker's network of branches are staffed and equipped to deliver the correct solution for your specific requirements.

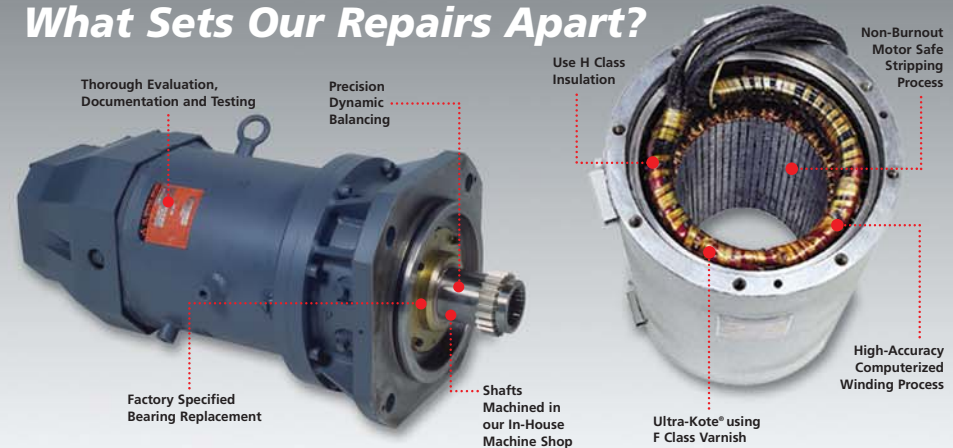

Motor Repair Services

Dreisilker Electric Motors is your source for repair solutions. We repair AC and DC Motors, generators, industrial magnets, brakes, solenoids, controls, AC and DC motor controls, gearboxes, foreign motors, hermetic compressors, pumps, eddy current clutches, synchronous motors, U-L explosion proof motors, dewatering and centrifugal pumps, gear motors, dry transformers, and specialty coils.

We serve a wide variety of industries including: Manufacturing, Printing and Converting, School Districts, Municipalities, Hotels, Commercial Properties. Our experienced technicians are in a unique position to provide superior repair and modification services with a complete in-house machine shop. We have the ability to fabricate very small parts as well as rebuild large equipment up to 20,000 lbs. Our capabilities include fabrication, welding, milling, turning, dynamic balancing, modifications and electrical or mechanical redesign of your new or existing equipment for custom applications.

What Sets Our Repairs Apart?

Servicing Industry for Over 50 Years!
